The school district and public officials appreciate the significant contribution the employees of the Perry Plant have made over the last several years to support nuclear legislation. They have gone above and beyond, dedicating their time and effort by attending events and speaking out. They have gone door to door asking their neighbors to support this legislation and have helped educate the public on the clean benefits of nuclear power. Although the best several years have been challenging for them with an uncertain future, they have stepped up to the plate and shown their dedication to this community. Thank you.
